

	Technical Data Sheet			
Use in	<ul style="list-style-type: none">Pharmaceutical IndustryFor industrial, laboratory & research applications onlyBasic medium according to EP 2.6.13 and USP <62>			
Use for	<ul style="list-style-type: none">Examination of non-sterile productsTest for specified micro-organismsTest for <i>Pseudomonas aeruginosa</i> <p>Application: Typically, 10 g of product are diluted in NaCl-Peptone Buffer (NPB, e.g., art.-No. 571.B090). The amount corresponding to 1 g of product is transferred to TSB (e.g., art-No. 500.B100) and incubated at 30-35 °C for 18-24 h. An aliquot is subcultured on Cetrimide Agar and incubated at 30-35 °C for 18-72 h. Growth of colonies indicates the presence of <i>P. aeruginosa</i>. In case colonies are detected, an identification test needs to prove the presence/absence of <i>P. aeruginosa</i>.</p>			
Typical composition per liter	Pancreatic digest of gelatine	20 g	Cetrimide	0.3 g
	Magnesium chloride	1.4 g	Glycerol	10 mL
	Dipotassium sulphate	10 g	Agar	13.6 g
	This medium can be adjusted / or supplemented according to the performance criteria required.			
Irradiation	<ul style="list-style-type: none">Not irradiated			
Filling volume	<ul style="list-style-type: none">23-26 mL			
Packaging	<ul style="list-style-type: none">Single bagged, staples of 10 platesTransparentHigh barrier foil against desiccation6 staples of 10 plates per packaging unitTemperature isolated handle-bag in the cardboard-boxes			
Plates per box	<ul style="list-style-type: none">60 plates (6 staples with 10 plates each)			
Shelf life	<ul style="list-style-type: none">9 months from production date			
Storage conditions	<ul style="list-style-type: none">Recommended storage temperature: 15-25 °CShould be stored at temperatures as stable as possibleStore protected from light exposureBefore use: it is recommended to keep the plates upright (agar on the lower part, lid on the upper part) to avoid formation of extra condensationAfter use: it is recommended to keep the plates upside down (agar on the upper part, lid on the lower part) to reduce the risk of accumulation of condensation during incubation which can affect colony formation			
Label	<ul style="list-style-type: none">On the side, at the bottom			

Technical Data Sheet	
Label information	<ul style="list-style-type: none"> • Product name: CET • Expiry date: YYYYMMDD → MMM in letters (e.g.: 2023Nov04) • Lot-number • Individual number • Barcode
Barcode	<ul style="list-style-type: none"> • 2-dimensional (data matrix), 20 digits: • Digits 1-3: Art.-No. • Digits 4-9: Lot-Number • Digits 10-14: Individual-Number • Digits 15-20: Date (YYMMDD)
Delivery	<ul style="list-style-type: none"> • Temperature controlled delivery on request • For shipments of larger amounts plastic pallets in Euro-size can be used
Petri dish	<ul style="list-style-type: none"> • Locking lid 90 mm plate, made from polystyrene • Long incubations possible – due to high filling volume • Long expositions possible – due to specific design of plate • Incubations in vent and closed position possible
Lid positions	<ul style="list-style-type: none"> • All plates are delivered in the non-locked position • The plate contains 2 locked positions. If turning the lid clockwise the locked positions are in the following order: <ol style="list-style-type: none"> 1. Vent position 2. Closed position
Aerobic incubation	<ul style="list-style-type: none"> • The closed position provides ideal incubation conditions for aerobic microorganisms and limits the dehydration of the agar during incubation • For long incubation of aerobic microorganisms, the closed position is recommended • To lock the lid in the closed position turn the lid clockwise into the final stop position
Place of production	PharmaMedia Dr. Müller GmbH Gustav-Throm-Str. 1, 69181 Leimen - Germany

Quality control, Certificates

Quality control, Certificates	
Temperature stress	<ul style="list-style-type: none"> Art. 450.0060 has been exposed to temperature stress conditions (3 days at 2-8 °C as well as 3 days at 30-35 °C) and has passed shelf-life testing at 218 days after the production date. Shelf-life testing comprise all regular tests which are part of the normal release test of this article except for sterility control (see CoA).
